DETAILED ACTION

Specification

The abstract of the disclosure is objected to because “Fig. (a)” and “Fig. (b)” are not clear as to the specific figures being referenced. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Re claim 1, the recitation “the selecting jack being capable of being selectively separated from the cam mechanism by pressing the butt from the carriage in cooperation with the selecting mechanism of the carriage with respect to the butt of the knitting needle’ has no clear and definite meaning as to the function taking place. Also the term “non-operative position” is unclear as to the element that is not operating.

Re claim 2, the recitation “in a direction where the needle grooves are provided in rows” is unclear as to the direction being claimed. The phrase “the side facing the carriage” is indefinite since it lacks clear antecedent basis.

Re claim 3, the recitation “a plate thickness direction” is unclear as to the direction being claimed since there is no previous recited basis for such a plate.

Re claim 4, the recitation “has a smaller width at an opening of the groove” is unclear as to which element has a smaller width and which elements has a larger width.

Allowable Subject Matter

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 2-6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
